

# Non-Invasive Laser Therapy for Pain!

- Find out how laser therapy lessens or eliminates old or new pain / injuries— perfect for athletes or weekend warriors!

Explore how these protocols address symptoms associated with chronic conditions / diseases such as:

- |                        |                         |                         |
|------------------------|-------------------------|-------------------------|
| -Back pain             | -Herniated discs        | -Sprains / Strains      |
| -Stenosis of the spine | -Bursitis               | -Post-surgical soreness |
| -Carpal tunnel         | -Toe fungus             | -Cellulite accumulation |
| -Tennis elbow          | -Neurologic dysfunction | -Wounds                 |
| -TMJ                   | -Knee pain              | -Plantar Fasciitis      |
| -Arthritis             | -Lymphedema             | -Parkinson's disease    |
| -Fibromyalgia          | -Migraines              | -And so much more . . . |
| -Sciatica              | -Muscular tension       |                         |

- Review cases where laser is paired with other natural pain management protocols as part of an integrated medical approach to wellness and healing.
- Lots of Q&A.
